

Mouldings

We offer a complete service with compression and injection moulding machines, along with full design and tool making facilities. A wide selection of polymers are available such as the following:

Rubber:	Thermoplastic:
Viton	Polyurethane
Silicone	PVC
Butyl	Polyethylene
Neoprene	Nylon
Nitrile (British Gas approved)	PTFE
EPDM (Water council approved)	

Extrusions

As with mouldings we offer a complete service including design and die making facilities. A wide range of polymers are available with sizes ranging from small glazing section to huge dockside fendering.

A standard range of extrusion profiles are available ex-stock for immediate despatch, other non standard profiles can be promptly manufactured to your requirements.

A free technical advisory service is available upon request. In addition we also offer a fully comprehensive service of rubber to metal bonding including tank lining and roller recovering for all sizes.
